

CONVERT YOUR EXISTING GLASS TO LAMINATED SAFETY GLASS WITH PROFILON HURRICANE AND SECURITY FILM

15 mil optically perfect protection 24/7 on your glass windows and doors provide you with the peace of mind of knowing your property is protected.

Overview

PROFILON was invented in Europe over 30 years ago for conversion of normal glass into laminated glass on site to address potential terrorist bombings. PROFILON is still used for that purpose and is installed on every US military base in Europe.

We brought PROFILON here to help address the issue of hurricane protection in a convenient and unobtrusive way on homes and businesses as an alternative to “boarding up” the windows.

Although slightly more costly at first, once your windows have been treated with PROFILON the protection is constant with no reason to fear not being prepared for a life threatening storm destroying your property.

PROFILON is UL listed as a component of burglary resistive glass for all glass from 1/8th inch thickness or greater. The tests that PROFILON had to pass would not be passed with 3/4 inch plywood.

And since PROFILON is installed worldwide for prevention of burglary and vandalism your property is much more secure without the need to find space to store shutters in the off season.

Once installed PROFILON is always there working for you.

Features at a Glance

- converts new or existing glass to laminated glass on site
- is so optically neutral that you don't even know it's there
- 24/7 protection from penetration of the windows
- no storage issues – always there
